

Navigating the Birth to Three Portal: Medicaid Remittance Details

The Medicaid Remittance Details report is utilized to review Medicaid adjudication data. This report provides users with details of an adjudication response. The report can also help identify trends in payments, denials, and missing adjudication information. Users can utilize this report to review claim payments and denials. Users may see some of the denied claim records in the Workable Claims queue. Best practice is to be reviewed bimonthly to at least monthly.
